AGREEMENT FOR A LONG-TERM METER ON HYDRANT

This agreement between the Southington Water Department and the Customer/Contractor will set a meter within a firebox on a hydrant approved by Southington Water Department. The locked firebox will contain a 2" meter, a 2" R.P.D. and have a 2 1/2" fire hose connection outlet. The Customer/Contractor must supply all hoses to be used beyond the connection. The location of the hydrant to be used will be determined by the Southington Water Department after consultation with the Customer/Contractor. If a Customer/Contractor wishes to use a different hydrant, they must come to our office to consult us and set an appointment for the approved meter relocation. All meters must be removed and returned to the Southington Water Department when temperatures are predicted to fall below 30 degrees Fahrenheit.

Under this agreement, a \$2,500.00 deposit is required. From this deposit, the cost of the water used, labor to set, remove or relocate the meter and test RPD will be deducted. Upon removal and return of the meter and RPD if no damage is found with the equipment, a final cost will be determined. Any difference in the total costs will be billed or refunded as the case may be.

Please note any cancellation of an appointment to set, remove, or relocate the meter must be made by 3:30 pm the day prior or a \$70.00 charge will be incurred.
